

<i>role</i>				
	model document <i>model/</i>	evidence, ledger <i>evidence/</i>	runtime <i>run_scenario</i>	scenario log <i>scenarios/</i>
interviewer		read		
compiler	propose	read		
critic	read		simulate	read
experiment designer		read	simulate	propose
policy searcher	read		simulate	read
human reviewer	approve			execute pilot

read, simulate, propose are agent stages; approve and execute are human gates, and the tool layer refuses them to agents instead of instructing
