

<i>role</i>		model document <i>model/</i>	evidence, ledger <i>evidence/</i>	runtime <i>run_scenario</i>	scenario log <i>scenarios/</i>
interviewer			read		
compiler	propose		read		
critic	read			simulate	read
experiment designer			read	simulate	propose
policy searcher	read			simulate	read
human reviewer	approve				execute pilot

read, simulate, propose are agent stages; approve and execute are human gates, and the tool layer refuses them to agents instead of instructing
